

CHANDAN VISHWAKARMA

Software Engineer | Application Support | Java | SQL | Linux | AWS

Mumbai, Maharashtra | +91-7208342941 | chandanv345459@gmail.com | linkedin.com/in/chan2004 | github.com/Chan2516 | chandandev.me

PROFESSIONAL SUMMARY

Software Engineer with 1+ year of professional experience developing and supporting enterprise ERP applications and banking integrations using Java, Spring Boot, and SQL. Experienced in production troubleshooting, log analysis, root-cause analysis, API testing, and resolving application, database, and integration issues in collaboration with QA and DevOps teams. Hands-on project experience with Linux/Ubuntu, AWS EC2, Docker, and GitHub Actions CI/CD. Interested in application support, operational automation, and improving service reliability.

TECHNICAL SKILLS

Languages: Java 17, Java 8, JavaScript, SQL, JSON

Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices

API & Integration: REST, Third-Party API Integration, Banking API Integration, JWT, RBAC, OpenAPI/Swagger

Frontend: React.js, Next.js, Bootstrap

Databases: PostgreSQL, MySQL, SQL Query Optimization

Cloud & DevOps: AWS EC2, Docker, ECS, ECR, GitHub Actions, CI/CD, Nginx, Linux/Ubuntu

Monitoring & Tools: Grafana, Git, GitHub, Maven, Postman

AI-Assisted Development: Cursor, OpenAI Codex, Google Antigravity

Legacy: J2EE, JSP/Servlets

PROFESSIONAL EXPERIENCE

Java Developer — ITaakash Software Solutions Pvt. Ltd.

September 2025 – Present

Mumbai, India

- Developed and enhanced a configurable Spring Boot microservice integrating 3+ banking APIs for payment initiation, balance enquiry, and bank statement retrieval, eliminating the need for client-specific backend changes.
- Collaborated with business and technical stakeholders to map financial data flows, clarify implementation scope, and translate requirements into backend integration solutions.
- Automated transaction status updates using Spring Scheduler and implemented structured logging and Grafana monitoring to improve diagnosis of banking integration failures.
- Investigated production issues involving financial data and integration failures, improving JSP/JavaScript validation to identify invalid or incomplete inputs earlier in the workflow.
- Optimized complex SQL queries spanning 10–20 related tables and performed root-cause analysis across legacy Java 8/J2EE and JSP modules.
- Used AI-assisted development tools including Cursor, Codex, and Antigravity to accelerate debugging, code investigation, and issue resolution.
- Troubleshoot production issues across enterprise ERP applications, REST APIs, databases, and banking integrations using application logs and root-cause analysis; collaborate with QA and DevOps teams to resolve issues.
- Support 3+ external banking API integrations through authentication, request/response validation, error handling, and production issue resolution.
- Execute unit and API tests using JUnit, Mockito, and Postman to identify defects and verify fixes during development and QA.
- Document REST endpoints using Swagger/OpenAPI to support integration understanding and troubleshooting.

PROJECTS

TaskFlow — Full-Stack Agile Task Management System

Java 17, Spring Boot 3, Spring Security, JWT, React.js, PostgreSQL

- Implemented Spring Security with JWT authentication and refresh-token rotation for protected API access.
- Built a React frontend integrated with Spring Boot REST APIs, using Context API for application state and implementing interactive drag-and-drop Kanban workflows.
- Built the React frontend using Context API and drag-and-drop Kanban interactions.

LocalCart — Full-Stack Multi-Vendor Marketplace

Next.js, Java, Spring Boot, PostgreSQL, Redis, Docker, AWS EC2, GitHub Actions, Nginx

- Built a full-stack multi-vendor marketplace with a Next.js frontend and Spring Boot REST backend supporting product, vendor, cart, and order workflows.
- Designed REST APIs with PostgreSQL persistence and Redis caching for application data and performance.
- Containerized Spring Boot services using Docker/Docker Compose, deployed to AWS EC2 behind Nginx with HTTPS, and automated build/deployment workflows using GitHub Actions CI/CD.

EDUCATION

Bachelor of Science in Information Technology

2022 – 2025

SIES College of Arts, Science and Commerce, Mumbai | CGPA: 8.6/10

TRAINING & COURSES

- Full Stack Java Development — Quastech, 2025
- Docker for Developers — Udemy, 2026
- DevOps Training — Tutedude, 2026
